

Aselsan Konya To carry out research, design, development and engineering activities, including but not limited to all kinds of weapons and weapon systems that will meet the defense needs of our country, production, testing, assembly and integration, sales and marketing, import and export of weapons, weapon systems and defense industry products. In order to export, provide training, maintenance and after-sales services, and carry out all kinds of commercial and industrial activities related to these issues, "Aselsan", 51% owned by ASELSAN and 49% by Konya Savunma Sanayi A.Ş. It was established with the title of "Konya Weapon Systems Joint Stock Company".

Aselsan Konya started its activities on December 17, 2020 and will be an important technology base for the Defense Industry, where unique products are developed. In line with this goal, infrastructure installations for weapon and weapon systems design, production, testing, assembly and integration were completed in a short time and production started within this scope.

In the current situation, a total of 2018 personnel have been reached, including design, sub-industry, quality, purchasing and production. Thanks to the experience and know-how acquired by the highly qualified human resources in its staff through the Weapons and Weapons Systems projects carried out in the companies they have worked with before and currently continuing to be carried out within Aselsan Konya, Aselsan Konya offers many different products, from small calibers to large calibers, tailored to the needs and optimized for the needs. caliber is capable of developing weapons and weapon systems.

The System Development and Project Management processes implemented within Aselsan Konya have been harmonized for the rapid and effective design of new weapons and weapon systems based on the knowledge and experience gained, as well as the reference process definitions applied for defense projects around the world. Combined with strong technological infrastructures, experience, highly qualified human resources and effective system development practices, it creates the necessary basis for the execution and successful conclusion of new weapon system development activities. In addition, studies are carried out to create a structure that will integrate with Konya and grow together by working in full cooperation with our universities in Konya with our motto "Together We are Strong" and making maximum use of the talents of the sub-industry companies that will be our solution partners in Konya.

ASELSAN has a very important worldwide market share in the field of Remote Controlled Weapon Systems (RCSS). Related UKSS productions have been transferred to Aselsan Konya and all supply, production, integration, testing and quality activities are carried out by Aselsan Konya. With the activities to be carried out by Aselsan Konya, it is aimed to increase the capacity and market share in this field.

Meeting the future needs of our country, our friends and allies with national means; Our efforts will continue in order to provide a price advantage for the export of our defense industry products and to eliminate the possible effects of government threats on products procured from abroad.

National Weapons Strong Defense..
